Secure success

Today, no business works alone. You're part of a bigger network, connected and collaborating like never before.

At Cybernara, we blend strategic advice with practical support, making cybersecurity easy. We'll help your business stay safe, grow faster, and confidently collaborate with anyone—anywhere.

We find risks, fix security gaps, and keep your business safe. With Cybernara handling your security, you can focus on growing your business without worries.

We understand your cybersecurity requirement & technology challenges

We'll partner with you, providing practical solutions to your biggest questions:

We're rapidly moving to the cloud—how can we keep our environment secure, compliant, and optimized?

Cyberattacks are becoming more frequent. How can we proactively identify and stop threats before they harm our business?

Our team is distributed and uses multiple devices—how do we effectively manage and protect every endpoint?

We know security gaps exist. Where do we start to identify and quickly fix them?

Managing identities and secure access across hybrid or cloud environments is complex. How do we simplify this?

Regulatory requirements keep changing. How can we confidently maintain compliance with standards like ISO 27001 or Essential 8?

We're adopting AI and machine learning—how do we ensure our data and AI models remain secure?

We need DevOps support—how can we securely accelerate our software development and deployment?

We listen to you.

No matter how tricky things seem, we're here to help you with practical cybersecurity solutions.

We take time to understand exactly what you need. Our team works closely with yours to make sure your business stays safe.

We're always just a call away, ready to support you whenever you need us.

Cyber Solutions

Cybernara provides complete cybersecurity support to help you keep your business safe, compliant, and secure across any environment.

Security Assessment

- VAPT Services
- Cloud Security Assessment
- AI & ML Security Assessment
- Security Health Checks
- Web & Application Security Assessment

Compliance & Risk Management

- Compliance Advisory (ISO 27001, GDPR, PDPL, SOC2, HIPAA, Essential 8)
- Regulatory Audits & Support
- Risk Assessment & Mitigation
- Cybersecurity Policy Development
- Virtual CISO (vCISO)

Implement & Optimize

- Secure Cloud and Hybrid Implementations
- Identity & Access Management (IAM)
- DevSecOps & Secure DevOps Integration
- Secure MLOps Setup
- Zero Trust Security Services

Cybernara Talent & IT Support

- IT Helpdesk & Remote Support (daily IT operations)
- Cybersecurity Staff Augmentation (L1–L3 engineers, SOC, cloud, IAM specialists)
- Fractional/Contract Experts (vCISO, security architects, senior consultants)

Managed Protection & Monitoring

- Managed SOC (24/7 threat monitoring)
- Managed Endpoint Detection & Response (EDR)
- Incident Response & Digital Forensics
- Cloud Security Posture Management (CSPM)
- Data Leak Prevention (DLP)
- SIEM Services

Security Assessment

Our assessments help you clearly understand your security risks — and how to fix them.

VAPT Services

Identify and validate security weaknesses across networks, apps, and infrastructure.

Cloud Security Assessment

Assess risks unique to cloud workloads and configurations.

AI & ML Security Assessment

Detect vulnerabilities in AI/ML pipelines and data handling.

Security Health Checks

Rapid reviews of overall IT security hygiene and controls.

Web & Application Security Assessment

In-depth testing for coding flaws, misconfigurations, and app risks.

Implement & Optimize

Efficient security deployment, implementation, and optimization for your IT infrastructure.

Secure Cloud & Hybrid Implementation

End-to-end setup of secure cloud and hybrid environments.

Identity & Access Management (IAM)

Implement MFA, SSO, and RBAC to secure user access.

DevSecOps & Secure DevOps Integration

Embed security into CI/CD pipelines for faster, safer releases.

Secure MLOps Setup

Harden machine learning workflows and safeguard data pipelines.

Zero Trust Security Services

Shift to a “never trust, always verify” approach to protect critical assets.

Managed Protection & Monitoring

We protect your business around the clock from cyber threats.

Managed SOC (24/7 threat monitoring)

Continuous monitoring to detect and contain threats early.

Managed Endpoint Detection & Response (EDR)

Block and remediate malware, ransomware, and advanced attacks.

Incident Response & Digital Forensics

Contain breaches fast and investigate root causes.

Cloud Security Posture Management (CSPM)

Continuously monitor and remediate cloud misconfigurations.

Data Leak Prevention (DLP)

Prevent accidental or malicious leaks of sensitive data.

SIEM Services

Centralized log management and correlation for better visibility and response.

Compliance & Risk Management

Helping you stay compliant and reduce security risks with expert-driven solutions.

Compliance Advisory

Guidance on ISO 27001, SOC 2, GDPR, HIPAA, PDPL, Essential 8, and more.

Regulatory Audits & Support

Prepare for and pass external compliance audits smoothly.

Risk Assessment & Mitigation

Identify, quantify, and reduce business risks.

Cybersecurity Policy Development

Create policies that strengthen governance and resilience.

Virtual CISO (vCISO)

On-demand executive leadership to shape and mature your security program.

Cybernara Talent & IT Support

We extend your team with skilled experts and ensure smooth IT operations.

IT Helpdesk & Remote Support

Daily operations support for staff and systems.

Cybersecurity Staff Augmentation

On-demand engineers (SOC, cloud, IAM, L1–L3) to scale your team.

Fractional/Contract Experts

Flexible access to vCISOs, architects, and senior consultants.

Meet Our Partners

Partnering with the world's top cybersecurity and cloud leaders to keep you secure.

... and others.

Our Clients

Protecting businesses across industries with tailored cybersecurity solutions.

Government of
South Australia

... and others.

Why Cybernara?

At Cybernara, we protect what matters most - your business.

We don't offer one-size-fits-all solutions. Instead, we take the time to understand your needs and deliver tailored security that gives you confidence in a digital world.

Proven Expertise

Over 5 years of securing businesses across government, healthcare, and finance with proven cybersecurity solutions.

Certified Professionals

Our team is certified in CISSP, CCSP, CISM, OSCP, AWS, and Azure Security—delivering top-tier expertise to every project.

Client-Centric Approach

Your security, your way. We customize every solution to fit your business goals and security needs.

Client Success Stories

SOUTH AUSTRALIA HEALTH

SPLUNK & CYBERSECURITY COMPLIANCE

Built Australia's largest Splunk solution for real-time data insights and better threat detection. Also helped improve security and compliance.

VISION UNLIMITED GROUP

SECURITY POLICY IMPLEMENTATION

Created security policies to keep data safe and compliant with regulations.

VITAL VIRTUAL

HIPAA COMPLIANCE & SECURITY

Helped Vital Virtual meet HIPAA standards, keeping healthcare data safe and compliant.

BANK OF QUEENSLAND

CLOUD SECURITY IMPLEMENTATION

Set up a secure cloud system to ensure data protection, compliance, and easier access management.

ZOUMA CONSULTING SERVICES

SECURITY POSTURE IMPROVEMENT

Upgraded Zouma's security setup by improving risk management, monitoring, and compliance.

US-BASED CLIENT (CONFIDENTIAL)

INMATE CYBERSECURITY SYSTEM

Built a secure IT system for controlled access and data protection in a specialized inmate environment.
